Notes:

Students are allowed to take a class that shows one level above (or below) their current grade level with the approval of the teacher. We are trying to avoid large ranges in age/ability especially in the elementary years where the differences in maturity/ability will negatively effect the teacher's ability to teach and the class' ability to progress through the material.

Study Hall is available every period for those who are not signed up for a class. Students who are not leaving the premises with their parent must report to the study hall.

Math Tutoring is available in a special study hall during 1st, 3rd & 4th period. Students who sign up for math study hall are expected to bring their math work to co-op each week whether they need help or not.

Required materials are expected to be provided by the family and will not be purchased by the co-op.
